ABSTRACT

This report contains a comprehensive summary of place of class attendance statistics for Nova Southeastern University for calendar year 2000. This summary provides both collapsed and breakout statistics that offer more detail than can be included in the University's annual Fact Book. In 2000, 81% of Nova Southeastern students attended class in Florida, with 70% attending class in the tricounty south Florida area. Of these, 59% were in Broward County, location of the University's main campus. Eleven percent of all calendar year 2000 students attended class in other Florida counties. Nineteen percent attended class in non-Florida locations, including 11% in other states, 4% in international locations, and 4% at unidentified place of class. (SLD)

# PLACE OF CLASS ATTENDANCE OF NOVA SOUTHEASTERN UNIVERSITY STUDENTS DURING CALENDAR YEAR 2000

**Thomas W. MacFarland** **Senior Research Associate**
**Report 01-11** **July 2001**

## EXECUTIVE SUMMARY

Research and Planning regularly reports on a variety of enrollment statistics that support the University's planning process. In addition to enrollment statistics reported in the Weekly Enrollment Report and annual Integrated Postsecondary Education Data System (IPEDS) surveys, Research and Planning also publishes enrollment statistics in the University's Fact Book.

This report was prepared to provide a comprehensive summary of place of class attendance statistics for Calendar Year 2000. This summary provides both collapsed and breakout statistics that offer more detail than Research and Planning can publish within the limited space availability of the yearly Fact Book.

Regarding the place of class attendance of Nova Southeastern University students during Calendar Year 2000:

- 81 percent of all Calendar Year 2000 students attended class in Florida.
  - 70 percent attend class in the tri-county South Florida area:
    - Broward County ..... 59 percent
    - Miami-Dade County ..... 8 percent
    - Palm Beach County ..... 2 percent
  - 11 percent of all Calendar Year 2000 students attended class in other Florida counties.
- 19 percent of all Calendar Year 2000 students either attended class at non-Florida locations or their place of class attendance did not have an identified code:
  - Other states ..... 11 percent
  - International locations ..... 4 percent
  - Unidentified code ..... 4 percent

Overall, the University has experienced a 16 percent increase in calendar year enrollment from Calendar Year 1995 (CY 1995 N = 22,221 students) to Calendar Year 2000 (CY 2000 N = 25,796). Enrollment in Broward County (the location of the University's main campus) has increased from 65 percent of Florida-based enrollment in Calendar Year 1995 to 73 percent of Florida-based enrollment in Calendar Year 2000.

Although this report focused on enrollment at the many sites where students enroll for classes, also highlighted is the increased incidence of *Unidentified Place of Class Attendance*:

- In Calendar Year 1995, *Unidentified Place of Class Attendance* represented less than 1 percent of total enrollment (149/22,221 CY95 Enrollment = 0.67 percent).
- In Calendar Year 2000, *Unidentified Place of Class Attendance* represented over 4 percent of total enrollment (1,036/25,796 CY00 Enrollment = 4.02 percent)
- This change (a net increase of 887 students from Calendar Year 1995 to Calendar Year 2000 without an identified code for *Place of Class Attendance*) represents a 595 percent increase.
- More specifically, of the 1,036 Calendar Year 2000 students with *Unidentified Place of Class Attendance* status, 66 percent of these students (N = 680/1,036 or 65.64 percent) were enrolled in programs of the Fischler Graduate School of Education and Human Services.

The large increase in *Unidentified Place of Class Attendance* occurred in Calendar Year 1998, which approximates when the University planned for and then migrated to the Banner information system. New coding paradigms were needed to accommodate this new system and it would appear that at least for the *Cluster City* codes that signify *Place of Class Attendance*, there are quality issues that need to be addressed.

This concern is especially critical in terms of the management issues associated with new and emerging distance education modalities that diffuse standard *Place of Class Attendance* coding practices that are based on face-to-face meetings at identified geographical locations. There is a concern that the current incidence (4 percent of total enrollment) of *Unidentified Place of Class Attendance* will not support the monitoring practices needed for sound management of allocated site-based and other resources.

| 7 | Place of Class Attendance of Nova Southeastern University Students in Calendar Year 2000 by Academic Center: Breakouts by Individual Cluster Sites and State or International Locations | 16 |

## BACKGROUND

In an effort to contribute to sound administrative and monitoring practices, Nova Southeastern University's Office of Research and Planning publishes a Weekly Enrollment Report. In addition to this detailed weekly reporting process, annual enrollment statistics are also compiled through the completion of surveys associated with the Integrated Postsecondary Education Data System (IPEDS). These surveys are linked to the United States Department of Education and the National Center for Education Statistics. Participation in this survey process is mandated by statute (Title IV of the Higher Education Act of 1965, as amended) for participation in any Federal financial assistance program (*Integrated Postsecondary Education Data System Fall Enrollment Survey (For 4-Year Institutions), IPEDS-EF-1*; 1999).

The University's enrollment statistics are made available on a regular basis to the University community. In collapsed and selected breakout format, these enrollment statistics are also made available to other interested readers in the publication of an annual Fact Book. *Nova Southeastern University Fact Book 2001* (2001, pp. 50 to 57) included a chapter on student enrollment.

The purpose of this report is to publish a comprehensive summary of Nova Southeastern University enrollment statistics for Calendar Year 2000, with an emphasis on collapsed and breakout statistics related to place of class attendance. This calendar year place of class attendance summary provides another view of enrollment that is possibly more inclusive that what is provided in the Weekly Enrollment Report, IPEDS surveys, or the annual Fact Book.

## METHODOLOGY

On a yearly basis, the University's Office of Information Technologies is asked to prepare an extract file that includes a wide selection of information on calendar year (January 1 to December 31) enrollment. That extract file served as the data resource for this report and the *Cluster City* code was specifically used to query on *Place of Class Attendance*. All analyses were conducted with SPSS-X™ on the University's host computing system.

## RESULTS

A set of tables (Table 1 to Table 7) relating to place of class attendance of Nova Southeastern University students during Calendar Year 2000 is appended to this report. Among the many useful findings presented in these tables, it is interesting to note that:

- 81 percent of all Calendar Year 2000 students attended class in Florida.
  - 70 percent attend class in the tri-county South Florida area:
    - Broward County ..... 59 percent
    - Miami-Dade County ..... 8 percent
    - Palm Beach County ..... 2 percent
  - 11 percent of all Calendar Year 2000 students attended class in other Florida counties.
- 19 percent of all Calendar Year 2000 students either attended class at non-Florida locations or their place of class attendance did not have an identified code:
  - Other states ..... 11 percent
  - International locations ..... 4 percent
  - Unidentified code ..... 4 percent

## SUMMARY

The University has experienced a 16 percent increase in calendar year enrollment from Calendar Year 1995 (CY 1995 N = 22,221 students) to Calendar Year 2000 (CY 2000 N = 25,796). However, as presented below, there is a wide degree of variance in this growth on an annual basis:

**Nova Southeastern University Calendar Year Enrollment: CY 1995 to CY 2000**

| Period | Enrollment | Annual Change | | Change from CY 1995 | |
|---|---|---|---|---|---|
| | | N | % | N | % |
| CY 1995 | 22,221 | | | | |
| CY 1996 | 22,732 | 511 | 2.3 | 511 | 2.3 |
| CY 1997 | 24,828 | 2,096 | 9.2 | 2,607 | 11.7 |
| CY 1998 | 25,143 | 315 | 1.3 | 2,922 | 13.1 |
| CY 1999 | 25,618 | 475 | 1.9 | 3,397 | 15.3 |
| CY 2000 | 25,796 | 178 | 0.7 | 3,575 | 16.1 |

Along with these University-wide trends, this report also includes detailed breakout statistics that identify Calendar Year 2000 enrollment at individual sites throughout Florida, other states, and international locations. This report also includes Calendar Year 1995 to Calendar Year 2000 enrollment statistics (Table 3) that focus on enrollment at Florida-based Regional Service Centers. As evidenced in these supporting tables, there are some clear trends regarding enrollment at Florida locations:

- Enrollment in Broward County has increased from 65 percent of Florida-based enrollment in Calendar Year 1995 to 73 percent of Florida-based enrollment in Calendar Year 2000.
- Enrollment at Florida's other major urban areas where the University recently initiated full-service Regional Service Centers (Miami-Dade County, Palm Beach County, Jacksonville, Orlando, and Tampa) has remained fairly constant in terms of percentage of Florida-based enrollment.
- However, enrollment at the smaller Florida sites has declined from 10 percent of Florida-based enrollment in Calendar Year 1995 to 6 percent of Florida-based enrollment in Calendar Year 2000.

Along with identifying place of class attendance for the many individual sites where the University offers distance education opportunities, this report also identified the increased incidence of *Unidentified Place of Class Attendance* (i.e., *Cluster City* code):

- In Calendar Year 1995, *Unidentified Place of Class Attendance* represented less than 1 percent of total enrollment (149/22,221 CY95 Enrollment = 0.67 percent).
- In Calendar Year 2000, *Unidentified Place of Class Attendance* represented over 4 percent of total enrollment (1,036/25,796 CY00 Enrollment = 4.02 percent)
- This change (a net increase of 887 students from Calendar Year 1995 to Calendar Year 2000 without an identified code for *Place of Class Attendance*) represents a 595 percent increase.
- More specifically, of the 1,036 Calendar Year 2000 students with *Unidentified Place of Class Attendance* status, 66 percent of these students (N = 680/1,036 or 65.64 percent) were enrolled in programs of the Fischler Graduate School of Education and Human Services.

Careful examination of Table 3 indicates that there was a major increase in *Unidentified Place of Class Attendance* in Calendar Year 1998, which approximates the time when the University planned for and then migrated to the Banner information system. New coding paradigms were needed to accommodate this new system and it would appear that at least for the *Cluster City* codes that signify *Place of Class Attendance*, there are quality issues that need to be addressed.

Attention to policy and practices associated with *Place of Class Attendance* codes will only become more important as additional students use computer-mediated communication and other new and emerging distance education modalities that diffuse standard *Place of Class Attendance* coding practices that are based on face-to-face meetings at identified sites.

Further, to better manage the additional resources that will be allocated to the University's full-service Regional Service Centers, it is equally imperative that the University have an accurate sense of student enrollment and the places where students attend classes. There is a concern that the current incidence (4 percent of total enrollment) of *Unidentified Place of Class Attendance* will not support this monitoring practice with the accuracy needed for sound management of allocated resources.

The issue of a more precise sense of place of class attendance was also addressed in Table 7, where breakout enrollment statistics by sites are provided for all states and international locations. When appropriate, academic center directors and central administrative personnel may find it useful to carefully examine the breakout enrollment statistics in this table to see if there is any possible merit to consolidate low-enrollment rural and suburban sites into course delivery at more centrally located urban Regional Service Centers. As the University continues to introduce computer-mediated communication and other forms of "media-enhanced and reduced seat time" (Brown; 2001, p. 22) technologies into traditional face-to-face course delivery formats, it may be possible to reduce the required number of class meetings for some cluster-based courses. This action would likely have an impact on the marketing potential for students in more distant areas to drive to centrally-located urban-based Regional Service Centers. This level of consolidation may not only be more convenient for students, but it may also have positive cost savings for the University as low-enrollment sites are merged into high-enrollment central locations.

[1] *Non-Florida Place of Class Attendance* includes attendance at clusters/sites in other states, international locations, and *Unidentified Place of Class Attendance*.

Some of the students included in the *Non-Florida Place of Class Attendance* column may possibly attend class in Florida, but because of unknown or missing *Cluster City* codes it is not possible to list their place of class attendance. Details on the 1,036 Calendar Year 2000 students with *Unidentified Place of Class Attendance* status are presented by Academic Center in Table 4 and Table 7.

# REPRODUCTION RELEASE

(Specific Document)

## I. DOCUMENT IDENTIFICATION:

Title: Place of Class Attendance of Nova Southeastern University Students During Calendar Year 2000

Author(s): Dr. Thomas W. MacFarland

Corporate Source: Nova Southeastern University

Publication Date: 07-01

## II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

1

Level 1

☑

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) *and* paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2A

Level 2A

☐

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2B

Level 2B

☐

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

*I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.*

## III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, *or*, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
